LANGUAGES

- 🇯🇵 Japanese(Native)
- 🇬🇧 English(Intermediate)

Creative Tools (3D & Design)

Graphics & Game Engines

Programming Languages

Web & App Development

Development Operations

Platform & Infrastructure

HOBBIES

- Camera(Film/Digital)
- SOUNA
- Cooking
- Watching movies
- Walking around town

QUALIFICATIONS

- 9+ years of experience as a Technical Artist across AAA titles, specializing in GPU shader development, rendering optimization, and pipeline engineering on PC and console platforms.
- Acted as a technical bridge between engineers and artists; translated creative requirements into technical solutions and aligned both teams to deliver optimal results.
- Identified and resolved workflow bottlenecks across large-scale productions, streamlining pipelines to reduce iteration time and minimize rework

EXPERIENCES

Technical Artist (Freelance) | Dec.2024 - Present

- Personal Projects (2024–Present)
 - Developing cross-platform mobile apps using Expo and Flutter; backend infrastructure on Cloudflare (Workers, R2, D1)
 - Prototyping a custom game device; 3D concept modeling in Blender, visual design and texture generation using ComfyUI

Lead Technical Artist | SIE MY CO., Ltd. | Sep.2022 – Nov.2024

- Climate Station
 - Team: 5–10 | Artists: 3–5 | Engineers: 3–6
 - Developed C# editor tools and macros in Unity; supported build pipeline via Jenkins and Git
 - Supported multiple language caption pipeline in Unity.
- MLB Series
 - Team: 20–100 | Artists: 10–30 | Engineers: 10–15
 - Built game optimization tools and DCC pipeline scripts in MEL and Python for Maya
 - Developed MudBox plugin (Outliner/Importer) in C++
 - Created environment shaders in HLSL for Maya
 - Supported scan-based texture cleanup workflow for character assets
 - Supported facial animation solving for animators
- The Last of Us: Part II - Remastered
 - Team: 100–200 | Artists: 50–100 | Engineers: 3–7
 - Set up Naughty Dog’s artist workflows locally based on their internal documentation
 - Debugged rendering issues on PlayStation DevKit; diagnosed shader compilation errors and render target conflicts in collaboration with engineers
 - Supported shader troubleshooting and asset submission process
- General Support for studios and R&D
 - Team: 100–200 | Artists: 70–150 | Engineers: 10–30
 - Developed internal web API for color sampling/palette extraction from texture assets
 - Optimized existing toolsets and workflows
 - Developed annotation tools for internal use in Python
 - Prototyped AI-based texture generation pipeline in Maya using ComfyUI
 - Developed object detection tools using YOLO

Technical Artist (Freelance) | Mar.2022 - Dec.2022

- Provided support for video production
 - Built caption automation tools for video production

- Consulted for Unity shaders
 - Consulted on NPR shader development in Unity; developed supporting pipeline plugins

Lead Technical Artist at CAPCOM CO., Ltd. | Sep.2019 - Mar.2022

- STREET FIGHTER 6
 - Team: 80–200 | Artists: 40–100 | Engineers: 20–50
 - Resolved GPU shader performance bottlenecks using Razor GPU Profiler and RenderDoc; optimized character and environment rendering passes
 - Developed character artist support tools in Houdini and Maya; created character/environment shaders in proprietary game engine
 - R&D of new rendering techniques and visual expressions with engineers and artists

Senior Technical Artist at CAPCOM CO., Ltd. | Jun.2018 - Aug.2019

- STREET FIGHTER 6
 - Team: 100–200 | Artists: 60–120 | Engineers: 20–50
 - Developed master monitor color calibration workflow using Sony BRAVIA and Calman
 - Created character/environment shaders; NPR post-process and look development in Substance Painter
 - Built asset conversion tools for FBX and texture pipelines

Shader Artist / Cut Scene Animator at CAPCOM CO., Ltd. | Jun. 2017 - May.2018

- Devil MayCry 5
 - Team: 100–200 | Artists: 40–80 | Engineers: 10–50
 - Debugged and optimized shaders using PIX and RenderDoc; diagnosed GPU pipeline bottlenecks for cutscene rendering
 - Created character, environment, and cutscene-specific shaders

WORKSHOP

Panelist, Technical Artist Roundtable CEDEC 2018 – Tokyo, Japan

EDUCATION

Advanced Game Programming, Japan Electronics College - Tokyo, Japan(2014 - 2017)
